Corporate Sustainability Policy

The Corporate Sustainability Policy of JGCPL, as envisaged by its top management, rests on three important pillars of success, namely, Economic, Environmental and Social.

JGCPL firmly believes that sustainable economic progress of the organization is essential for strengthening the other two pillars of sustainability and the organization endeavors to achieve this through entrepreneurial and enterprise strengths coupled with innovative and analytical approach to business developments, stakeholders requirements and the competitive environment - both Domestic and International.

JGCPL is committed to create value for all its stakeholders by offering sustainable products and services which have a positive contribution on environment and society. This is achieved through conduct of all its operations in an environmentally responsible manner, adoption of most energy efficient technologies in manufacturing processes, including improvement of energy efficiency of equipment and focusing on people oriented and accountable organization by maintaining good working conditions.

On the social front, JGCPL is also committed to ensure sustainability for the communities where the organization endeavors to create value through its conduct, group initiatives and focused local programmes in terms of labour practices, human rights, ethics, occupational health, safety and environment.
